

I am writing to express my sincere appreciation of my local radio station, AIR 1. It provides my family with great music that we all love. It also keeps us up to date on traffic, weather, and news. The community as a whole benefits from this radio station because it's message is positive, it's music reaches all ages, and it's news and information is accurate. Displacing it with an LPFM broadcaster would turn many to satellite radio, if AIR 1 was on there. People shouldn't have to pay for their radio, but I know they would just to get AIR 1. There is no other station like it! The service AIR 1 provides is of public interest because it conveys to so many of us necessary information that we need on a daily basis and a one-of-a-kind music selection that you can't get anywhere else. It should not be displaced. Our voice should be heard.

Thank you,

Jennifer Sarratt & Family
